We Also Offer In-Class Workshops Assemblies

School Assembly Kick-off (Optional): Immediately before or during registration, our high-energy, action-packed half hour performances will excite your students about science and inform them of what they can expect should they sign up for Mad Science. For larger schools, assemblies can be split by grade level (K5-2 and 3-5th grade) to ensure grade and age-appropriate instruction.

Registration Materials: All registration forms are provided. They are customized for your program, delivered to your school, and bundled for each teacher's classroom, if needed. Full color posters, FAQs for parents and students and PA informational announcements are also available.

Payment Processing: Mad Science will collect all funds and process all registration forms.

Scheduling and Rosters: Mad Science will handle the registrations; we will create all class rosters and provide the school with class lists prior to the start of the program.

Instruction: Mad Science provides all equipment and materials. Our certified instructors arrive in Mad Science lab coats at least 15 minutes before class to set up their equipment. Every Mad Scientist assumes responsibility for each student in his care until released to an authorized parent or guardian.

Take-home Materials: Each class every student will make and take home a science project related to the topic that week. Mad Science provides take home cards each week which describe the instruction their child experienced and additional activities that will extend the fun and learning.

Fundraising Support: To help your school with its fundraising efforts, Mad Science will donate a deluxe Mad Science Birthday Party with a retail value of over \$299. These are frequently used in PTA auctions or as student raffles. (available upon request)

National PTA studies have shown that families desire after-school programs at their school in overwhelming numbers. Students enrolled in these programs improve their in-school performance. The school, as a whole, benefits from better student attendance, behavior and higher test scores. However, implementing an After School Program can be quite daunting.

Mad Science has over 20 years experience with offering fun, hands-on science programs in after-school settings.

With our stand-alone program, we can do everything for you and your school so that your staff or parent volunteers can concentrate their efforts elsewhere. We do not stop at offering just a fun science club to several of your students. Mad Science creates a partnership with your school community by offering a multitude of additional benefits for your students, parents, and PTA.
